1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 9/8/03 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 13 and 16-19 are rejected under 35 U.S.C. 102(e) as being anticipated by Kelly ('168). See Figure 3 and column 3, lines 6-45. Base portion 32 may be considered the instantly claimed substrate and lip portion 34 may be considered the instantly claimed elastomer portion. The base portion 32 has a perpendicular projection and the lip portion 34c forms a cavity. The various statements of intended use such as "for use at a pillar area ..." (claim 13), "for supporting a seal" (claim 13), "for receiving ..." (claim 18), "for use in an ..." (claim 19), etc. do not add any structurally distinguishing features to the claimed article. Concerning the terms "interior" and

Art Unit: 1772

"exterior", these are relative terms depending on the position of one viewing the appliqué and intended use of the appliqué.

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Kelly ('168). The reference discloses the invention substantially as claimed; see Figure 3 and column 3, lines 6-45. However it does not disclose the use of nylon as a substrate material. The reference does suggest the use of olefins and polypropylene as a substrate material; see column 3, line 29. It would have been obvious to one of ordinary skill in the art to use any well-known olefin, such as nylon, as a substrate material in the article of the reference to provide the optimum physical properties for a particular end use. Similarly, it would have been obvious to one of ordinary skill in the art to use a mixture of known materials as the substrate material in the article of the reference to provide optimum properties for a particular end use.
- 6. Claim 14 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 1772

7. Claims 1-6 and 9-12 are allowed.
